

Project submission form

PhiLab

This form is intended to collect the information necessary to evaluate projects submitted for the purpose of awarding a \$2,500 start-up grant.

*PhiLab affiliate members may apply for a startup grant, provided that the project is carried out in partnership with a university researcher.

Title and team

Title of the project	
Project supervisor(s) (First and last name, Home university)	
Partner(s) (Name of organization, first and last name of contact person)	
Researchers (First and last name, Home university)	
Student researchers (First and last name, Home university)	

Project implementation

Presentation of the roles of partners, students, and team members

--

Research context

PhiLab

Describe the context and the need being addressed by the research, justifying its relevance and providing a brief review of the literature on the subject, including key studies and existing knowledge.

Research question(s)

PhiLab

Statement of the research question(s) that form the basis of the project. Description of what the project aims to study, analyze, or develop.

Methodology

Description of the methodological approach and the project implementation process.

Research outputs

PhiLab

Indicate the planned deliverables of the research (articles, reports, infographics, podcasts) intended to disseminate and promote the results.

Budget

Specify the use of the funds granted

Bibliography

PhiLab

List the complete bibliographic references used in this proposal.
